

Mrs Sumitra has already lost 5 kids in the last 8 years. (All born prematurely before time and dying at 7-10 days of life due to infection, lack of care etc.)

The mother, ie Mrs Sumitra has already had 3 caesarian sections and this was probably her last chance to conceive normally.

The baby is currently on ventilator support, IV antibiotics.

Kindly help the family as much as possible.

में राजेश, मेरा बच्चा यहां टांखिन है -

लाइफलाइन किडनी हॉस्पिटल, बल्लंथर में।

में बहुत गरीब हूँ। मैं मजदूर हूँ।

मेरे घर की आर्थिक स्थिति बहुत

कमज़ोर है। कृपया मेरे बच्चे के

इलाज के लिए मेरी मदद की जाये।

धन्यवाद।

राजेश राजेश्वर ।

INTERPRETATIONS :

Blood gas measurements are used to evaluate a person's lung function and acid/base balance. It may also be ordered when someone is known to have a respiratory, metabolic, or kidney disease and is experiencing respiratory distress. In case of oxygen therapy or (ventilation), blood gases may be measured at intervals to monitor the effectiveness of treatment. Other treatments for lung diseases may also be monitored with blood gases.

The complete blood count, CBC is often used as a broad screening test that evaluates the three types of cells that circulate in the blood & helps to determine an individual's general health status. It can be used to :

- Screen for a wide range of conditions and diseases.
- Help diagnose various conditions, such as anemia, infection, inflammation, bleeding disorder or leukemia.
- Monitor the condition and/or effectiveness of treatment after a diagnosis is established.
- Monitor treatment that is known to affect blood cells, such as chemotherapy or radiation therapy.
